## Characteristics and typical fields of application

Basic covered electrode with good welding characteristics including out of position work; weld metal recovery 110 %, low H2-content in the weld metal <5 ml/100 g; very pure cryogenic weld metal at temperatures as low as -50°C, CTOD tested up to -10°C

Suitable for use in structural steel work, boiler making, tank construction, ship and bridge building and vehicle manufacture; particularly suitable for welding fine grained structural steels. Suitable for welding in the offshore industry.
