## Characteristics and typical fields of application

**Union S 2 - UV 400** is a wire-flux combination for submerged arc welding of unalloyed, fine grained and pipeline steel grades.

**UV 400** is an agglomerated, aluminate-basic flux. Its characteristic is a low Silicon and a middle Manganese pickup. It can be used on AC and DC. The good weld ability and the good mechanical properties offer a universal application. For information regarding UV 400 flux see our detailed data sheet.

## Base materials

Steels up to a yield strength of 380 MPa (56 ksi)
